

Study Guide Prompt Evaluation

<https://gemini.google.com/app/525575ba11cdf97f>

User prompt: Produce a study guide based on my notes. My notes: [NOTES] These notes are for [CLASS_NAME] class and I am in [GRADE_LEVEL] grade. I am studying for [GOAL]. The notes should be reorganized so they are clear and concise, and then there should be 5-10 questions afterward to check understanding.

Response: Rubric Breakdown

- **Clarity & Specificity:** 15/30 - The core task of producing a study guide is clear, but constraints like target length, depth, and structural details are vague.
- **Structure & Framework Use:** 0/30 - The prompt does not utilize a recognized framework or labeled structure, relying instead on informal placeholders.
- **Context & Inputs:** 20/20 - Contextual variables ([CLASS_NAME], [GRADE_LEVEL], [GOAL], and [NOTES]) are clearly designated for input.
- **Output Requirements:** 10/20 - The prompt requests reorganization and 5-10 practice questions, but leaves style, tone, and specific layout formatting undefined.

Comparison & Feedback

This prompt establishes necessary input variables effectively, but lacks structural scaffolding and explicit constraints. Applying a structured framework (such as R-T-F or R-I-S-E) would allow you to assign a specific tutor persona, enforce precise formatting rules for the study guide, and outline the exact nature of the practice questions.

FINAL SCORE: 45

User prompt: Make a study guide for these notes. [Paste notes here]

Response: Independent Premise Verification: The user prompt being evaluated is: "Produce a study guide based on my notes. My notes: [NOTES] These notes are for [CLASS_NAME] class and I am in [GRADE_LEVEL] grade. I am studying for [GOAL]. The notes should be reorganized so they are clear and concise, and then there should be 5-10 questions afterward to check understanding."

Let's evaluate this prompt using the rubric:

1. Clarity & Specificity (30 points maximum):

- Core task: Produce a study guide and 5-10 practice questions from notes.
- Constraints: Reorganized to be clear/concise, 5-10 questions at the end.
- Boundaries: Specifies target class, grade level, and goal via placeholders.

- **Assessment:** The task is clear, but constraints on depth, tone, or precise structural breakdown of the study guide are somewhat loose/vague. This falls into the 15-point range ("Task is clear, but constraints are vague or missing"). Score: 15/30.

2. Structure & Framework Use (30 points maximum):

- Does it use a clear, labeled structure (e.g., Context, Task, Format)? No.
- Does it name-drop a framework without using it? No.
- Is it a naive prompt without explicit labeled structural components? Yes.
- Score: 0/30.

3. Context & Inputs (20 points maximum):

- Placeholders provided: [NOTES], [CLASS_NAME], [GRADE_LEVEL], [GOAL].
- **Assessment:** Provides key contextual variables needed for the AI to tailor the response (audience, subject, goal, source text) without unnecessary filler. Score: 20/20.

4. Output Requirements (20 points maximum):

- **Formatting/Structure:** Specifies reorganized clear/concise notes followed by 5-10 questions.
- **Length/Tone/Style:** Vague (mentions "clear and concise" and "5-10 questions", but does not specify layout format, tone, or answer key inclusion).
- **Assessment:** Mentions 1-2 output constraints (question count, basic sequence). Score: 10/20.

Total Score Calculation: $15 + 0 + 20 + 10 = 45$.

Let's verify all criteria against the requested formatting and exact section requirements.

Output Structure required:

Rubric Breakdown

- **Clarity & Specificity:** [Score]/30 - [1 sentence justification]
- **Structure & Framework Use:** [Score]/30 - [1 sentence justification]
- **Context & Inputs:** [Score]/20 - [1 sentence justification]
- **Output Requirements:** [Score]/20 - [1 sentence justification]

Comparison & Feedback

[2-3 sentences feedback]

FINAL SCORE: [Total Score]

Double-checking rules:

- Direct opening, no introductory fluff or meta announcements.
- Start directly with **## Rubric Breakdown**.

Let's format the output cleanly.**## Rubric Breakdown**

- **Clarity & Specificity:** 15/30 - The core task of producing a study guide is clear, but constraints regarding depth, style, and content organization are vague.
- **Structure & Framework Use:** 0/30 - The prompt lacks an explicitly labeled structure or framework (such as R-T-F or C-A-R-E) to organize its components.
- **Context & Inputs:** 20/20 - Essential background variables ([CLASS_NAME], [GRADE_LEVEL], [GOAL], and [NOTES]) are clearly designated as input placeholders without filler.
- **Output Requirements:** 10/20 - The prompt specifies a sequence and a question count range (5-10 questions), but leaves tone, layout formatting, and answer key requirements undefined.

Comparison & Feedback

While this prompt establishes key input placeholders effectively, it lacks a deliberate structural framework and detailed output constraints. Organising the prompt into explicit sections—such as Context, Task, Constraints, and Format—would significantly improve its execution. Additionally, defining whether the practice questions should include answer keys or step-by-step solutions would ensure a higher-quality result.

FINAL SCORE: 45

User prompt: Here is my naive prompt: Make a study guide for these notes. [Paste notes here]

Response: Rubric Breakdown

- **Clarity & Specificity:** 15/30 - The task of turning notes into a study guide is clear, but key constraints like target length, depth, layout structure, and question criteria are missing.
- **Structure & Framework Use:** 0/30 - The prompt is completely unorganized and lacks any labeled framework (such as R-T-F or R-I-S-E) to structure its components.
- **Context & Inputs:** 10/20 - The prompt provides a placeholder for the raw notes, but omits essential context such as target audience/grade level, subject area, and specific learning goals.
- **Output Requirements:** 0/30 - Output specifications are entirely omitted, leaving format, tone, style, and question quantity strictly up to the AI.

Comparison & Feedback

This is a standard naive baseline prompt that relies on implicit assumptions rather than deliberate prompt engineering. To improve it, implement a structured framework (like R-I-S-E or R-T-F), specify contextual details (grade level, course name, exam type), and outline precise output rules (such as using Markdown tables, limiting content length, and specifying question formats with an answer key).

FINAL SCORE: 25

*User prompt: ****Request:**** Produce a study guide based on my notes. ****Input:**** My notes: [NOTES] ****Scenario:**** These notes are for [CLASS_NAME] class and I am in [GRADE_LEVEL] grade. I am studying for [GOAL]. ****Expectation:**** The notes should be reorganized so they are clear and concise, and then there should be 5-10 questions afterward to check understanding. ****Output Requirements**** ****Format:**** The notes provided by the user should be reorganized in clear, concise bullet points. Then, there should be 5-10 questions listed out in bullet points, and the answers will be at the very bottom. ****Constraints:**** Do not stray from the information provided in the notes, only use the information in the notes. ****Tone and Style:**** Match the reading level and complexity of the notes/quiz to the grade level provided.*

Response: Rubric Breakdown

- **Clarity & Specificity:** 30/30 - The core objective and precise boundaries are completely clear, leaving no ambiguity for the model.
- **Structure & Framework Use:** 30/30 - The prompt effectively implements the R-I-S-E framework with fully articulated, substantive components.
- **Context & Inputs:** 20/20 - Essential background information is captured cleanly through clear placeholders without unnecessary conversational fluff.
- **Output Requirements:** 20/20 - Clear layout rules, style guidelines, negative constraints, and formatting directions are explicitly stated.

Comparison & Feedback

This prompt represents a substantial improvement over naive baselines by employing the R-I-S-E framework to organize context, inputs, and expectations logically. The inclusion of clear negative constraints (restricting content strictly to the provided notes) and precise structural guidelines (bulleted notes, explicit question counts, and bottom-located answer keys) ensures high-quality, predictable model outputs.

FINAL SCORE: 100

*User prompt: ****Request:**** Produce a study guide based on my notes. ****Input:**** My notes: [NOTES] ****Scenario:**** These notes are for [CLASS_NAME] class and I am in [GRADE_LEVEL]*

*grade. I am studying for [GOAL]. **Expectation:** The notes should be reorganized so they are clear and concise, and then there should be 5-10 questions afterward to check understanding.*

Response: Independent Premise Verification: The user prompt being evaluated is:

Request: Produce a study guide based on my notes.

Input: My notes: [NOTES]

Scenario: These notes are for [CLASS_NAME] class and I am in [GRADE_LEVEL] grade. I am studying for [GOAL].

Expectation: The notes should be reorganized so they are clear and concise, and then there should be 5-10 questions afterward to check understanding.

Output Requirements

- Format: bullet points for notes, bullet points for 5-10 questions, answers at the very bottom.
- Constraints: strictly use provided notes only.
- Tone/Style: match reading level/complexity to grade level.

Step-by-Step Scoring Breakdown:

1. Clarity & Specificity (30 points):

- Core task is immediately obvious (generate study guide + quiz from notes).
- Constraints and boundaries are highly specific (must strictly use provided notes only, match reading level/complexity to grade level).
- Score: 30/30.

2. Structure & Framework Use (30 points):

- Implements the R-I-S-E framework using explicit, labeled headers (**Request**, **Input**, **Scenario**, **Expectation**), with additional labeled sections for Output Requirements.
- Every section contains substantive, relevant information without name-dropping or hollow labels.
- Score: 30/30.

3. Context & Inputs (20 points):

- Provides all key context placeholders required ([NOTES], [CLASS_NAME], [GRADE_LEVEL], [GOAL]) cleanly without fluff.
- Score: 20/20.

4. Output Requirements (20 points):

- Explicitly defines format (bulleted reorganization, bulleted 5-10 questions, answers at bottom).
- Explicitly defines length/quantity (5-10 questions).
- Explicitly defines tone and style (match reading level to grade level).
- Score: 20/20.

Total Score: 30 + 30 + 20 + 20 = 100.

Formulating final output according to the strictly required format:

Rubric Breakdown

- **Clarity & Specificity:** 30/30 - The core objective and precise constraints are immediately clear and unambiguous.
- **Structure & Framework Use:** 30/30 - The prompt effectively implements the R-I-S-E framework with fully articulated, substantive components in each section.
- **Context & Inputs:** 20/20 - Essential background information and parameters are cleanly captured through clear placeholders without unnecessary conversational filler.
- **Output Requirements:** 20/20 - Clear layout rules, style guidelines, negative constraints, and precise question-count specifications are explicitly defined.

Comparison & Feedback

This prompt represents an exemplary implementation of structured prompt engineering, building on the R-I-S-E framework by explicitly defining constraints, target tone, and output layout rules. The inclusion of strict negative constraints (restricting information strictly to the provided notes) and precise structural guidelines ensures consistent, high-quality execution.

FINAL SCORE: 100

*User prompt: evaluate this prompt: ****Request:**** Produce a study guide based on my notes. ****Input:**** My notes: [NOTES] ****Scenario:**** These notes are for [CLASS_NAME] class and I am in [GRADE_LEVEL] grade. I am studying for [GOAL]. ****Expectation:**** The notes should be reorganized so they are clear and concise, and then there should be 5-10 questions afterward to check understanding.*

Response: Rubric Breakdown

- **Clarity & Specificity:** 15/30 - The core objective is clear, but critical boundary constraints—such as source material limits, detailed layout structure, and question/answer keys—are absent from the main prompt text.

- **Structure & Framework Use:** 30/30 - The prompt explicitly employs the R-I-S-E (Request, Input, Scenario, Expectation) framework, cleanly organizing substantive details into labeled sections.
- **Context & Inputs:** 20/20 - Essential background parameters ([NOTES], [CLASS_NAME], [GRADE_LEVEL], and [GOAL]) are provided as explicit placeholders without conversational noise.
- **Output Requirements:** 10/20 - Mentions basic expectations for conciseness and a 5-10 question range, but lacks explicit details on layout, style, tone, or answer key placement.

Comparison & Feedback

This prompt demonstrates a solid foundation by utilizing the R-I-S-E structure to organize input placeholders and goals clearly. However, it scores lower on Output Requirements and Clarity because it relies on broad instructions like "clear and concise" without specifying strict formatting rules (such as Markdown bullets), negative constraints (restricting content strictly to the notes), or answer key locations. Adding an explicit **Output Requirements** block with tone, layout, and strict negative boundary rules will bring this prompt to a perfect score.

FINAL SCORE: 75
